

# REFLECTION **LEDko™ P**

## Instruction manual Manuale di istruzioni

Ver. 2.1  
DIS151

Serial number/numero di serie

Date of purchase/data di acquisto

Retailer/fornitore

Address/indirizzo

Suburb/cap/città

Capital city/provincial

State/stato

Tel./fax

Please note in the space provided above the relative service information of the model and the retailer from whom you purchased your **Reflection LEDko P** : this information will assist us in providing spare parts, repairs or in answering any technical enquiries with the utmost speed and accuracy.

Prendete nota, nello spazio apposite, dei dati relative al modello e al rivenditore del vostro **Reflection LEDko P** questi dati ci permetteranno di assistervi con la massima rapidità e precisione.

**WARNING:** the security of the fixture is granted only if these instructions are strictly followed; therefore it is absolutely necessary to keep this manual.

**ATTENZIONE:** la sicurezza dell'apparecchio è garantita solo con l'uso appropriato delle presenti istruzioni, pertanto è necessario conservarle.

## English

Thank you for having purchased a Coemar product. You have assured yourself of a fixture of the highest quality, both in the componentry and in the technology used. We renew our invitation to you to complete the service information form on the previous page. This will assist in providing prompt and accurate advice from your Coemar service centre, which you can thoroughly trust and to which you can submit any requests for service or information. Following the instructions and procedures outlined in this manual will ensure the maximum efficiency of this product for years to come.

### 1. Packaging and transportation

#### 1.1 Packaging

Open the packaging and make sure that no part of the equipment has suffered any damage during the transportation. In case of damage to the fixture, contact your carrier and your supplier immediately by telephone, fax or email, and inform them you will formally notify them in writing through registered letter.

##### Packing List

Make sure the packaging contains:

- 1-Reflection LEDko P
- 2-This instruction manual.
- 3-Main power plugs

#### 1.2 Transportation

**Reflection LEDko P** must be transported exclusively in its original packaging or in an appropriate flight case.

### 2. General information

#### 2.1 Important safety information.

##### Fire prevention:

1. Never locate the fixture on any flammable surface.
2. Minimum distance from flammable materials: 0.5 m.
3. Minimum distance from the closest illuminable surface: 0.5 m.
4. Connect the projector to mains power protected by a thermal magnetic circuit breaker.

##### Preventing from electric shock.

1. Presence of high voltage inside the fixture. Insulate the projector from mains supply before opening or performing any function which involves touching the inside the fixture, including lamp replacement.
2. For the connection to the mains, adhere strictly to the guidelines outlined in this manual.
3. The level of technology of **Reflection LEDko P** requires the use of specialised personnel for all service applications; refer all work to your authorised **Coemar** service centre.
4. A good earth connection is essential for the proper functioning of the projector. Never connect the fixture if there is no earth connection.
5. Mains cables must not come into contact with other cables.
6. Do not operate the projector with wet hands or in an area where water is present.
7. The fixture must never be located in an exposed position, or in areas of extreme humidity.

##### Safety.

1. The projector must always be installed with bolts, clamps, or other fixing devices which are suitably rated to support the weight of the projector.
2. Always use a secondary safety fixing device with chain or steel wire of a suitable rating to sustain the weight of the unit in case of failure of the principal fixing point.
3. The external surfaces of the unit, at various points, may reach 60°C. Never handle the unit until at least 10 minutes have elapsed since the lamp was turned off.
4. Never install the fixture in an enclosed area lacking sufficient air flow; the room temperature must not exceed 35°C.
5. The projector contains electronic and electrical components which must under no circumstances be in contact with water, oil or any other liquid. Failure to do so will compromise the proper functioning of the projector.

#### 2.2 Warranty conditions

1. The fixture is guaranteed for a period of 12 months from the date of purchase against manufacturing or materials defects.
2. The warranty does not extend to damage caused by inappropriate usage, use by inexperienced operators or inadequate maintenance.
3. The warranty is immediately void if the projector has been tampered or opened by unauthorized personnel.
4. The warranty does not extend to fixture replacement.
5. Both the serial number and the model of the projector are required for any advice or service from your authorised service centre.

#### 2.3 EC Norms

The projector meets all fundamental applicable EC requirements.

3. Product specifications

3.1 Technical characteristics

Power	90 -250 Vac 50/60Hz Autosensing
Maximum current	0.81 A at 230 VaC - 2.07 A at 90 Vac
Power factor	Cos ϕ = 0.9
Light source wattage	168 W
Maximum room temperature	35°C/95°F
Weight	5 Kg/11.2lbs(main body)
Weatherproof rating	IP20

3.2 Dimensions

## English

### 3.3 Unit's main components

### 3.4 Rear panel, description

\*Do not link more than 16 units @230V. or more than 8 units @90V.

**WARNING! Never park the projector which hasn't installed optical without the dust cap.**

## 4. Installation

### 4.1 Optical installation

Remove the frontal cap by loosening the upper and lower screws enough to free the cap itself, set the optic's angle tilted about 60°. Insert the optic's angle into the body's receptacle and turn the optic 60° until it is firmly assembled to the projector body, free to rotate but not free to detach itself from the body. Ensure the optic to the body by tightening the two screws previously loosened.

## English

### 4.2 Mechanical installation

**Reflection LEDko P** may be hung from an appropriate structure in any position or a tripod.

If hanging the fixture from a lighting truss or similar, we recommend the use of an appropriate clamp "A", as shown in the following diagram.

#### WARNING!

Always ensure that your support structure and fixing (bolts, clamps, etc...) are rated to support the weight of the fixture.

### 4.3 Safety chain

When hanging **Reflection LEDko P** it is recommended to use a safety chain, as required by current legislation. The safety chain must passthrough the handles of the unit and then attached to the structure.

If using steel cables and chains not Coemar's production, make sure they are suitable to support the weight of the unit according to normative UL/ETL (required: the weight of 6 complete devices for at least one hour)

### 4.4 Adjusting unit's tilt

In order to adjust the tilt of the unit simply loose the side handle adjust the tilt and lock the yoke by tightening the handle again.

## 5. Powering up

### 5.1 Operating voltage and frequency.

The unit may operate at voltages ranging from 90 to 250Vac at a frequency of 50 or 60 Hz. It is not needed to effect any setup procedures: **Reflection LEDko P** will automatically adjust its operation to suit any frequency or voltage within this range.

### 5.2 Connection to mains power

#### Mains cable characteristics

The mains cable provided is thermally resistant, complying to the most recent International standards.

Note: in case of cable replacement, similar cable with comparable thermal resistant qualities must be used exclusively (cable 3X1.5  $\phi$  external 10 mm, rated 300/500V, tested to 2 KV, operating temperature -40°C + 180°C, **Coemar** cod. CV5311 and for USA and Canada cod. CV5307).

#### Connection to mains power

**Reflection LEDko P** is equipped with two power connectors, one as input and one as output, which can be used to connect more fixtures in series (no more than 16 units @230V or 8 units @ 115 V).

The max absorption of **Reflection LEDko P** is reported in the following table :

-230/240V 0.81 A constant during normal exercise.

-90V 2.07 A constant during normal exercise.

**WARNING !**  
Never link more than 16 units at 230 V or 8 units at 90 V.

In the following figure you can see an example of series connection:

#### WARNING!

- The use of a thermal/magnetic circuit breaker is recommended. Strict adherence to regulatory norms is strongly recommended.
- **Reflection LEDko P** should not be powered through a dimmer as this may damage the internal switching power supply.
- Prior to connecting the device to mains power, ensure that the mains characteristics are within the recommended range for use with **Reflection LEDko P**.
- All cabling and connections should be carried out by suitably qualified personnel.

## 6. Control signal connections

### 6.1 Control signal connection by XLR5 plugs.

The digital control signal is transmitted to the projector via a two pole cable screened as per International standards for the transmission of DMX512 data. The connection must be serial, using connectors XLR5 male and female located on the back of **Reflection LEDko P** labelled DMX512 IN e OUT (see diagram).

### WARNING !

Make sure that screening and conductors are not in contact one another or with the metal housing of the connector. Pin#1 and housing never must be connected to the power supply unit.

## 7. Turning on the projector

After having followed the preceding steps described, proceed with the power supply and turn on the projector connecting it to the mains power.

The software version installed on the internal microprocessors will be shown on the display, suddenly it will show the current DMX addressing. If the address blinks, it means that the DMX signal has not been received. Check the connection cable and the mixer functioning.

### 7.1 DMX address of the unit

Each projector can use up to 5 address channels for its complete operation and is controlled by a DMX512 signal (for further information, see section 7.2, DMX functions).

#### DMX addressing

When powered up initially, each projector will show A001, which indicates DMX address 001; for example. A second unit must be addressed as A006, a third one as A011 and soon. The operation must be carried out on every **Reflection Ledko P** which has address different from A001.

#### Altering DMX address.

1. Press the + or – button until the display shows the required DMX address. The digits on the display will blink to indicate that the variation has not been registered.
2. Press the **enter** key to confirm your selection. The digits on the display panel will cease to blink and the projector will now respond to the new address.

**Note:** by holding the + or – button down the scrolling will be faster; thus allowing a faster selection

### WARNING!

If you alter the DMX address with no DMX signal connected, the digits on the display panel will continue to flash even after you have pressed ENTER button to confirm the address.

## 7.2 DMX functions

channel		function	type of control	effect	decimal		percentage	
1	1	master dimmer	proportional	adjust luminous output intensity from 0 to 100%	0	- 255	0%	- 100%
	2	spare channel	step	no effect	0	- 255	0%	- 100%
	3	dimmer fine	proportional	fine dimmer control 16 bit	0	- 255	0%	- 100%
	4	strobe	step	no effect	0	- 9	0%	- 4%
			proportional	variable speed strobing effect, from slow to fast	10	- 57	4%	- 22%
			step	stop strobe	58	- 59	23%	- 23%
			proportional	sequenced pulse effect, slow closing, fast opening (variable speed pulsing, from slow to fast)	60	- 108	24%	- 42%
			step	stop strobe	109	- 110	43%	- 43%
			proportional	sequenced pulse effect, fast closing, slow opening (variable speed pulsing, from slow to fast)	111	- 159	44%	- 62%
			step	stop strobe	160	- 161	63%	- 63%
			proportional	random strobe effect with variable speed from slow to fast, synchronized colors	162	- 207	64%	- 81%
			step	stop strobe	208	- 209	82%	- 82%
			proporzionale	random strobe effect with variable speed from slow to fast, not synchronized colors	210	- 255	82%	- 100%
	5	special functions	step	park, no effect	0	- 9	0%	- 4%
				600Hz	10	- 84	4%	- 33%
				fan at low-noise speed	85	- 96	33%	- 38%
				fan at auto-silent speed	97	- 108	38%	- 42%
			proportional	fan speed control from minimum to maximum	109	- 120	43%	- 47%
			step	fan at maximum speed	121	- 133	47%	- 52%
				LCD display off	134	- 185	53%	- 73%
				LCD display on	186	- 199	73%	- 78%
				LED control frequency tuning 1000Hz	200	- 205	78%	- 80%
				LED control frequency tuning 3000Hz	206	- 211	81%	- 83%
				LED control frequency tuning 6000Hz	212	- 217	83%	- 85%
				LED control frequency tuning 8000Hz	218	- 223	85%	- 87%
				LED control frequency tuning 10000Hz	224	- 229	88%	- 90%
				LED control frequency tuning 12000Hz	230	- 235	90%	- 92%
				LED control frequency tuning 14000Hz	236	- 241	93%	- 95%
				LED control frequency tuning 16000Hz	242	- 247	95%	- 97%
				LED control frequency tuning 19000Hz	248	- 255	97%	- 100%

## 8. Display panel functions

By suitably using all the functions of **Reflection LEDko P**, which can be activated through its display panel, it is possible to change some of the parameters and to add some functions.

Changing the preset settings made by **Coemar** can vary the functions of the projector so that it will respond differently to the controller; therefore carefully read about the functions described here before carrying out any possible selection.

### 8.1 Quick guide to menu

In order to access the functions, just press the menu button: press the key + or - to scroll pages. To select the desired function, press *enter* key.

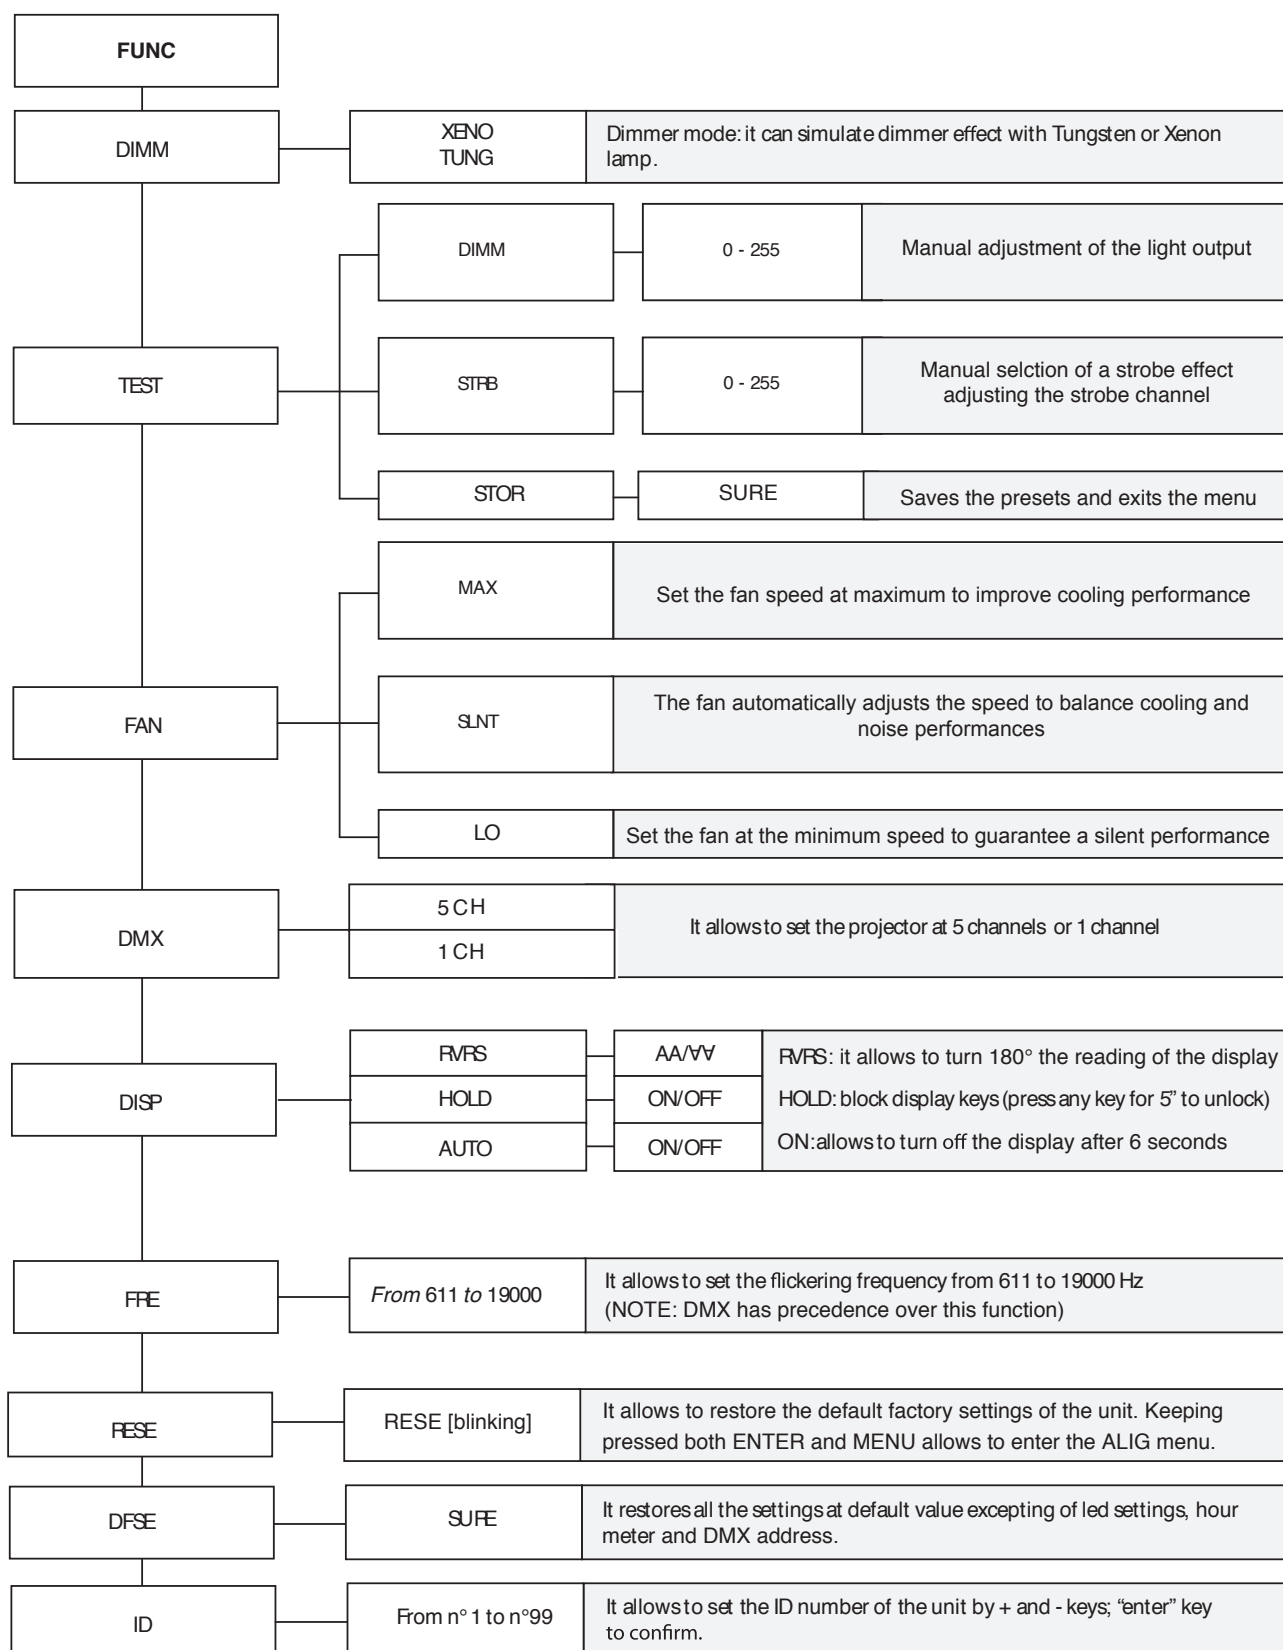

### 8.2 Rapid count

By the display panel of **Reflection LEDko P** It is possible to quickly change the various numbers displayed for the different functions in the following 3 manners:

1. Pressing the + or - buttons will cause the count to be quicker.
2. Pressing first + and then - and then holding them down simultaneously will cause the numbers to jump to the highest value.
3. Pressing first - and then + and then holding them down simultaneously will cause the numbers to jump to the lowest value.

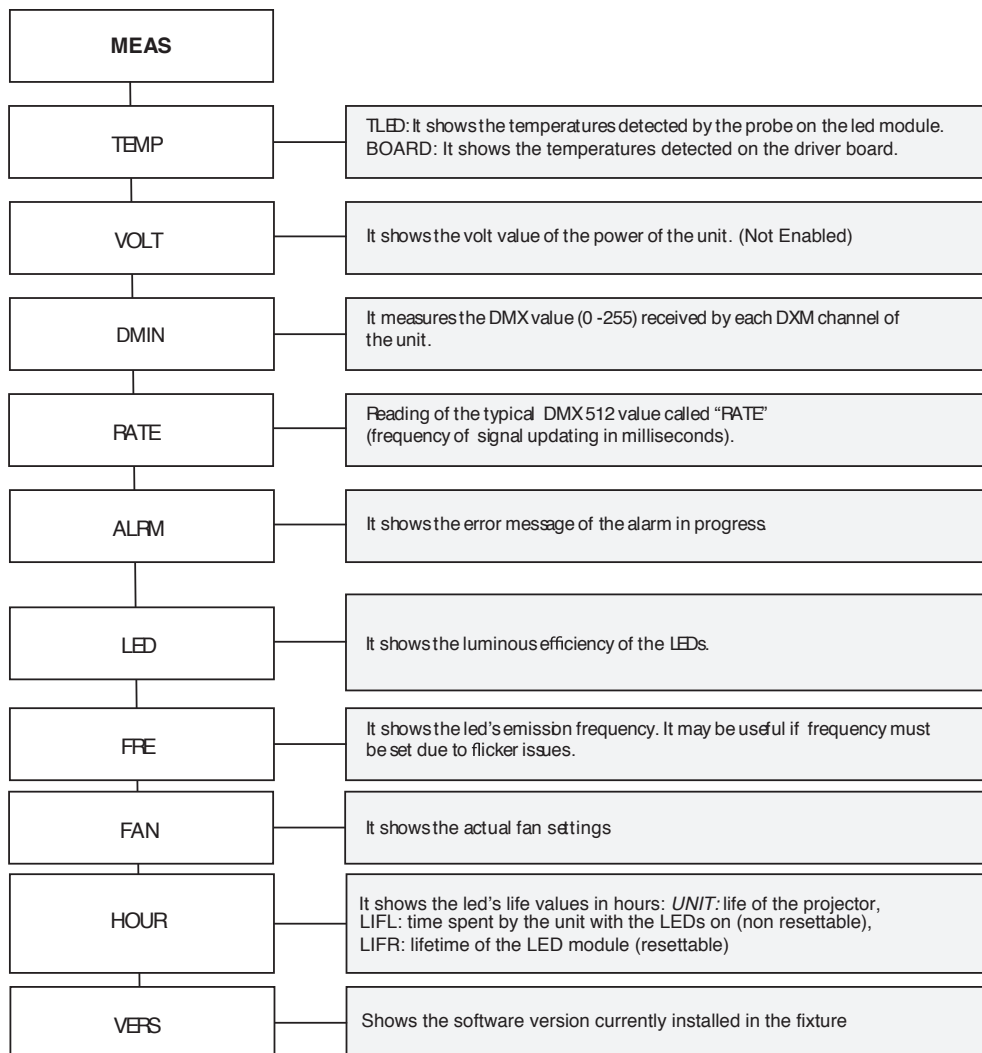

### 8.3 Main function menu (FUNC)

The projector gives the opportunity to change and customize some functional settings.

## 8.4 Measures and tests (MEAS)

The internal microprocessor of Reflection LEDco P allows for several diagnostic and output parameter to be displayed.

8.5 Electronic alignment of the leds.

The display panel of **Reflection LEDko P** allows the electronic alignment of the LEDs, this procedure is performed by Cœmar at the time of testing, this procedure may be useful for special effects or incase of replacement of internal components (PCBs, LEDs, etc....). Altering the settings made by Cœmar may radically alter the functioning of the projector's functions. Carefully read the following prior to attempting any changes.

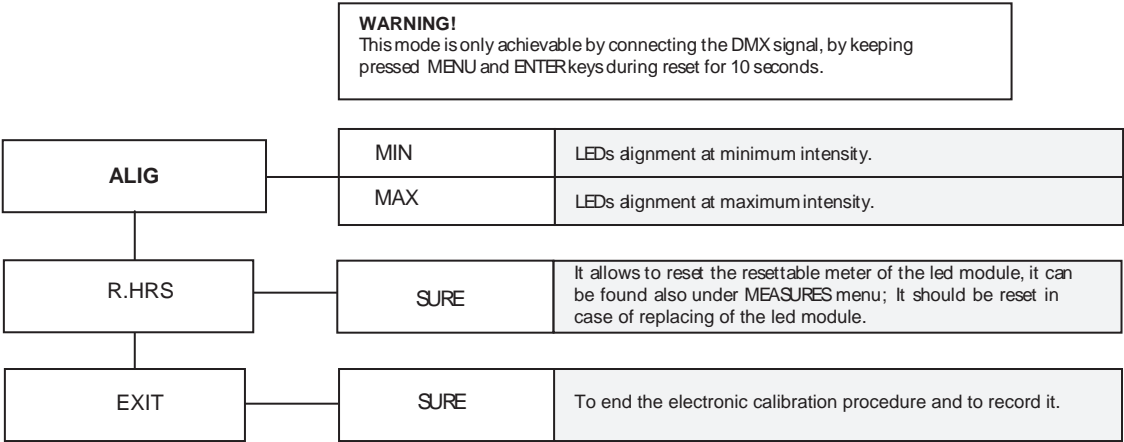

**WARNING !**  
This chapter should be considered for the exclusive use of technicians and qualified personnel.

To access alignment function:

Activate the reset holding down the MENU and ENTER for at least 10 seconds while powering on. Screen is then displayed "ALIGN ".

**WARNING !**  
The electronic alignment procedure is only possible with DMX512 signal.

See the following diagram to enter in the function's details.

**Note:** Simultaneously pressing + and - buttons will return the calibration of default value.

## 9. Error messages

If a malfunction occurs, **Reflection LEDko P** has a self-diagnostic system that will show the error message on the display. The following table will explain in detail the most common errors. If, despite of suggested intervention, the problem persists, call the Coemar Service center near you.

Error message	Description and suggested solution.
DTER	DATA error The initial configuration data has failed, the projector has uploaded the default configuration: turn on the projector again and if the error persists, contact your Coemar service to control or replacement EEPROM
ADER	DMX Address Error The projector does not receive all channels of DMX needs to function properly. Check the DMX address indicated on the display and the number of channels generated by the mixer control. We recall in this connection that some controllers do not generate all the 512 channels.

## 10. Accessories and spare parts

**Reflection LEDko P** is a very versatile fixture, optional accessories for its customization are available under request:

Coemar Order Code	Description
AFO9305	Fligh case for 3 LEDko and 3 optics
AFO9306	Fligh case for 6 LEDko
BC10011A006	Magnetic gobo holder
BC10011A001	Soft profile PC
BC10011A002	Soft profile Fresnel
BC10011A003	Profile Zoom 26° - 40°
BC10011A004	Profile 26°
ACO4201	Barndors kit
BC10011A012	Lens tube 19°
BC10011A013	Lens tube 26°
BC10011A015	Lens tube 36°
BC10011A016	Lens tube 50°
BC10011A017	Zoom tube 15° - 35°
BC10011A019	Zoom tube 25° - 50°
BC10011A020	Lens tube 19° (bianco)
BC10011A021	Color Frame Holder

All the components of **Reflection LEDko P** are available as spare parts from your Coemar dealer or Service. Accurate description of the fixture, model number and type will assist us in providing for your requirements in an efficient and effective manner.

## 11. Maintenance

### 11.1 Periodic cleaning

#### Lenses

Even a fine layer of dust can reduce the luminous output and alter the compactness of the beam. Regularly clean all filters and lenses using a soft cotton cloth, dampened with a specialist lens cleaning solution.

#### Cleaning of the unit

Use a soft brush or a common vacuum cleaner or a source of compressed air for removing dust. For the cleaning of the housing use a soft cloth and a non-aggressive cleaner.

### 11.2 Periodic controls

Check that the internal fans and heat exchanger must be perfectly clean.

#### Mechanicals

Check the correct working of the mechanical parts and, if needed, replace them. Make sure the projector is not mechanically damaged. If necessary, replace the worn parts.

#### Electrical components

Check all electrical connections, in particular for correct grounding and correct attachment of all extractable connectors. Press the connectors if necessary and reposition as before.

### 11.3 Fuses:

**Reflection LEDko P** has an automatic fuse that in most cases does not need to be replaced.

## 12. F.A.Q. and answers

The following list shows common issues that may be simply solved. If issues persist, the unit must be repaired by qualified personnel or just contact your Coemar service near you.

Question	Possible cause	Suggested solution
<b>Reflection LEDko P</b> does not power on.	-Projector not powered on.	1-Make sure the power cord is plugged in or test the input voltage.
<b>Reflection LEDko P</b> does not answer to DMX signal.	DMX signal may not reach <b>Reflection LEDko P</b> .	poor connections or inefficient repair or replace damaged cables. Check DMX address of the unit.

	<p style="text-align: center;"><b>Information on disposal of the equipment</b></p> <p>The equipment at the end of its useful life must be disposed of at an appropriate recycling center for waste electrical and electronic equipment. The treatment and disposal of environmentally friendly, helps prevent potential negative environmental and health and promote the reuse and / or recycling of materials making up the equipment. Illegal disposal by the user includes the application of administrative sanctions provided by law.</p>
---	---

Our equipment has been manufactured and assembled by the rules and the essential requirements of the RoHS directive, so the materials we use and electronic subassemblies that we receive from our suppliers have been checked and are produced in compliance with the Directive in question.
